Quincy Thomas Stewart is an Associate Professor of Sociology and a Faculty Fellow in the Institute for Policy Research at Northwestern University. Professor Stewart investigates the dynamic processes that create inequalities in socioeconomic status, health, and mortality. He has published on quantitative methods for studying inequality and estimating mortality, as well as on racial and ethnic disparities in socioeconomic status, health, and mortality. Stewart’s current work includes analyzing theories of racial inequality using agent-based models, examining the role of disease prevalence in mortality outcomes, investigating mentoring networks in social science, and studying racial disparities in a range of outcomes including attitudes, socioeconomic status, and health. In 2006, Stewart was a Robert Wood Johnson Foundation Scholar in Health Policy Research at the University of Michigan. Before joining Northwestern, he was a faculty member in sociology at Indiana University.
